

Robert Williams

Luverne, Alabama

The E-Rate program is now one of the cornerstone's of our goal to provide students with the resources needed to develop 21st Century skills. However, at the current funding level, we cannot provide all students the access needed to develop these skills. The wealth of a nation is its youth and it is imperative that the funding level be increased at a minimum of \$5 billion which is a 5th of what was wasted with the government shut down.
